Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 July 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

- 6) ☐ Other: _____.

DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 4 and 7 do not clearly describe the invention. The distinct components of the electrodes are not discernible from the claim language. For example, the input terminals for measuring are formed by other electrodes, as are the output terminals and the pad electrodes. It is unknown which surfaces or surface the electrodes are actually on given the claim language: "a pair of primary electrodes disposed at the center of said AT-cut crystal substrate" would seem to indicate that they are not on a surface center but actually within the structure. The description of the pad electrode being formed in the middle of the lead electrode is likewise confusing.

Allowable Subject Matter

Claims 5 and 6 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art fails to show six grooves arranged on an AT-cut crystal, which further has a cavity and which features electrode components, e.g. inputs and outputs as well as leads traversing the grooves in the manner claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 4 and 7 are so indefinite that art cannot be considered against them at this time. When they are made definite such a consideration may be made.
